**Watergenics GmbH incorporates in the United States as Watergenics Inc. to expand market reach**

**Berlin, Germany** – Watergenics GmbH, leader in water tech innovation, is pleased to announce the official incorporation in the United States, as **Watergenics Inc.**, marking a significant milestone in its global expansion strategy.

Following the rapid expansion in the Americas over the last 18 months, Watergenics GmbH sets foot in the US. The US market presents unique opportunities for water management solutions, allowing Watergenics Inc. to better serve existing customers and connect with key sectors, among which mining, petrochemicals, desalination, semiconductors, pulp and paper, pharmaceuticals, as well as food and beverage.

*“The US is our primary market expansion target especially due to its development in the semiconductor sector. Recent federal and state regulations have created an urgent demand for innovative, high-quality water technology and Watergenics answered to this call.”* Dr. Liviu Mantescu CEO & Founder

Founded in 2019 in Kreuzberg, Berlin, Watergenics is at the forefront of innovation in water tech. Its unique optical sensor technology and proprietary algorithms for data processing and analytics help the industry to achieve a smooth transition to a world renewable economy.
